Padappai Garden Villa

Set behind a gated compound wall and shaded by mature palms and frangipani trees, this two-storey family villa pairs a clean white plaster facade with local stone cladding at the entrance. Louvred wooden screens filter light into the upper-floor bedrooms, while a covered veranda extends the living area into the garden.

Tambaram Modern Residence

Designed around a double-height entrance and a landscaped front lawn, this residence uses exposed concrete, warm timber slat screens, and full-height glazing to stay bright by day and glow from within after dark. A covered carport and paved driveway complete the street-facing elevation.

RENOVATION · South Chennai · 2022

Heritage Home Restoration

This restoration preserved the character of a traditional red-oxide veranda — timber columns, a hanging swing, and terracotta roof tiles — while quietly upgrading the structure, wiring, and waterproofing behind the scenes. The result keeps a family's original home intact for another generation.
